— PROVERBS 3:6

INTRODUCTION

Introduction

Chamberlain-Hunt Academy is a Christian, military boarding school dedicated to educating all her Cadets in "Knowledge and Wisdom in Submission to God" in every area of life, and maintains a safe, disciplined environment in which this can occur. The Academy operates on enrollment fees and the financial gifts of churches, foundations and individuals while receiving no federal or state tax-funded support.

Chamberlain-Hunt Academy enrolls boys as boarding Cadets in grades seven through twelve and boys and girls as day Cadets in grades seven through twelve. Both boarding and day Cadets participate in the military program.

The Academy's Corps of Cadets is a diverse group, spanning the spectrum of economic, ethnic, geographic and social backgrounds. The one thing every Cadet has in common is a parent or guardian who recognizes the importance of discipline and respect for biblical authority, which are necessary to successful learning and living.

The boarding school model facilitates training through the elimination of many distractions and inconsistencies rampant in contemporary culture. Cadets living under its established routine and in compliance with the well-defined limits of Academy regulations know exactly what is expected of them. Boundaries are clear. This certainty provides security and safety, from which Cadets can develop in mind, body and character.

The military structure simplifies daily routines and provides opportunities to develop self-discipline and leadership traits. It promotes both individual achievement and corporate responsibility.

The Christian faith as summarized in *The Westminster Confession of Faith* and *The Larger and Shorter Catechisms* interprets life at the Academy. It affirms that the Triune God is the Creator and, therefore, definer of Truth and reality. His Word, contained in the writings of the Old and New Testaments, teaches man how to relate to God, each other and the world around him. Whether in the classroom, on the sports field, in the Wilderness or in the dorm, Cadets learn these things.

During this 129th year of operation, I invite you to examine carefully this bulletin and to visit the campus; consider the advantages Chamberlain-Hunt Academy offers your child. In this bulletin, we endeavor to describe what the Academy is and what it attempts to do. Remember, however, that any steps toward maturity that any Cadet makes will be his own. He may enroll as a boy, but by God's grace, he will emerge as a man.

Knowledge and Wisdom!

JOHN G. "JACK" WEST
COL, CHA—*President*

Oakland Chapel, Alcorn State University

OUR HISTORY

History

A History of Chamberlain-Hunt Academy

★ Chamberlain-Hunt has a proud history dating back to the early years of the nineteenth century, when the South and West were mostly unknown and undeveloped. Back in the days when the Louisiana Purchase was news, the American Republic was young. A young Presbyterian minister (an 1817 graduate of Princeton Seminary) from Pennsylvania heard the call of the Southwest and saw by faith something of its future.

With the same missionary spirit that took Paul into Macedonia and David Livingston into Africa, Jeremiah Chamberlain left the presidency of Centre College in Kentucky to devote his life to educational and evangelistic work in Mississippi and Louisiana. In the early 1820's, Chamberlain opened a school in Clinton, Louisiana but decided a better location could be found farther north in Mississippi. In 1830, with the help of two or three students, he felled the trees to build the first buildings on the site of the new Oakland College in Claiborne County, Mississippi. His house, which was one of the first buildings constructed, still stands.

“The direction in which education starts a man will determine his future life. — PLATO

Soon Oakland College was filled with students from every Southern state. From its roll of graduates could be listed a splendid array of the names of men who achieved more than ordinary prominence. Mississippi River steamboats brought throngs from far and near to attend the closing exercises at Oakland. Remnants of old aristocratic homes in the area suggest the pomp and ceremony with which those celebrations had been met. Notable Presbyterian minister Dr. Benjamin Morgan Palmer frequently visited Oakland and the chapel often echoed with his oratorical genius.

In 1856, Dr. Chamberlain was killed at the front gate of his home, next to the college chapel. Heated political controversy agitated the entire nation. In a passionate argument, a local man, under the influence of alcohol, stabbed him—no doubt never intending murder—and Dr. Chamberlain bled to death. Full of remorse, the murderer took his own life shortly thereafter.

Without Dr. Chamberlain at the helm and suffering from economic devastation, Oakland College never recovered from the War despite a serious effort to maintain it. In 1871, the Synod of Mississippi, which owned the College, sold the property to the State of Mississippi for the establishment of an agricultural college for freed slaves. This first land grant college for African-Americans in the United States is known today as Alcorn State University.

The Synod used the proceeds from the sale of Oakland College to establish a new school in 1879 and named it, fittingly, for two men who made Oakland great: Jeremiah Chamberlain, who founded it, and David Hunt, once the largest landowner in Mississippi, who endowed it. Chamberlain-Hunt Academy's first president was David Lecky (1879-1883). Mr. Lecky was followed by W. C. Guthrie, who holds the distinction of being the Academy's longest serving leader, from 1883 to 1907.

Housed at first in the Annex of Port Gibson's Presbyterian Church, the Academy moved to its present campus in 1900. The two original campus buildings, McComb Hall and Guthrie Hall, were designed by noted New York architect George Palliser. A military department was included in 1894, and the Academy became a full military school in 1917. It has been a member of the Southern Association of Colleges and Schools (SACS) since 1911 and is a charter member of the Mississippi Private School Association, which organized in 1968. In 2004, the Association of Christian Schools International (ASCI) received Chamberlain-Hunt into membership. In 2007,

First Presbyterian Church, Port Gibson, MS

Chamberlain-Hunt partnered with Claiborne Educational Foundation to become a member of the Association of Classical Christian Schools (ACCS).

Having begun as a Presbyterian school for boys, the Academy became an independent, coeducational school in 1970. In April 1998, Chamberlain-Hunt came under the control of the Board of French Camp Academy, an historically Presbyterian boarding school about 150 miles north of Port Gibson on the Natchez Trace. This change in governance reinvigorated the Academy's Christian and military character. Today, while Chamberlain-Hunt's day program remains co-educational, its boarding program is open to boys only.

BUILDINGS AND FACILITIES

The Campus of Chamberlain-Hunt Academy

At the time of its founding in 1879, Chamberlain-Hunt Academy was housed in the old Brashear Academy Building, behind the First Presbyterian Church of Port Gibson. By 1898, the Board of Trustees began to plan a move to a new campus in order to expand the school's mission. The first two buildings constructed there were McComb Hall and Guthrie Hall, built in 1900, and designed by the renowned New York architect George Palliser.

McCOMB HALL

Over half of the academic classes at Chamberlain-Hunt are held in McComb Hall. This building is original to the present campus (circa 1900) and houses fifteen classrooms, an auditorium, library, computer lab, four administrative offices and two large storage and work areas at basement level. Photographs of McComb before the 1920s fire are available for viewing on campus.

“It’s not enough that we do our best; sometimes we have to do what’s required.” — SIR WINSTON CHURCHILL

GUTHRIE HALL

Also original to the present campus, Guthrie Hall survived the 1920s fire with comparatively little damage. It served as a dormitory at the main level up to the third floor until the 1990s, at which time the building became too dilapidated for operation. Guthrie underwent renovation and was completed in the summer of 2006. It houses all administrative offices including a sizeable board room and office for the president on the main floor, a staff

apartment and teacher workroom on the basement level and rooms for forty to fifty Cadets on the second and third floors.

THE WHITE HOUSE

Originally called “The Principal’s House,” this frame structure was completed in 1902. It was moved due north from its original site in front of Guthrie Hall in 1983. After serving as a residence for various administrative staff, the house was used as the girls’ dormitory for the 2001-02 school year, the last year Chamberlain-Hunt operated a female boarding program. In the summer of 2002, offices for admissions and alumni relations were moved into the house.

REDUS HALL

Redus Hall was constructed around 1930 to replacing dorm space destroyed by the McComb fire. The building has TAC officer apartments with interior and exterior entrances on both floors as well as eighteen rooms for Cadets.

GAGE HALL

Chastened by the devastating fire of 1924, the Board of Trustees decided to build a new dormitory that would be fireproof. Gage Hall is made of concrete, steel and brick, and constructed in the International Style. It was dedicated on May 11, 1948, and named in honor of Judge R. D. Gage, Chairman of the Board of Trustees from 1924-1942 and 1944-1953. Refurbished in 2002, it currently has 26 rooms available for Cadets. Downstairs is the canteen (presently nicknamed the “Eatatorium”), which includes an auditorium equipped with audio-visual equipment.

“Character cannot be developed in ease and quiet. Only through experience of trial and suffering can the soul be strengthened, ambition inspired, and success achieved.” — HELEN KELLER

THE KENNEDY GYMNASIUM

The Gymnasium was constructed in 1955, and its lobby was added in 1966. It was named for COL J. W. Kennedy, on the faculty since 1916 and president of the Academy from 1921 until 1942. He began his tenure as commandant of Cadets and was a tireless advocate of military training. The Gymnasium houses a basketball court upstairs, which is one of the few remaining suspended wooden floor courts in existence. Downstairs was completely refurbished in the summer of 2004, and houses Cadet locker rooms, equipment rooms and training rooms. Also in 2004, a swimming pool was added to the rear (south) of the building, along with an entrance directly into the Cadet locker room.

THE JENKINS INFIRMARY

This little building was dedicated in 1966, and named for Dr. W. N. Jenkins, the long-time school physician and trustee. In 1999, the sickbay and nurse's office were converted into two apartments.

THE PRESIDENT'S HOME

This brick residence was finished in 1970. Erected on the corner of Church Street and McComb Avenue, the two-story structure was constructed to accommodate the need for both adequate living space and the president's necessity to entertain guests of the Academy.

THE SCIENCE BUILDING

This building was made possible by a capital fund's drive undertaken by the Synod of Mississippi. It was dedicated on November 9, 1971, and named for Robert D. Gage Jr., Chairman of the Board of Trustees from 1954 until 1970. It provides laboratory space for chemistry and biology and houses all math and most seventh and eighth grade classes.

BOLLING DINING HALL

Dedicated on July 12, 1977, this building was named for the Rev. Mr. Richard A. Bolling, a Chamberlain-Hunt alumnus from the class of 1905, member of the Board of Trustees from 1940 until 1971, and pastor of the First Presbyterian Church of Cleveland, Mississippi from 1926 until 1962. Cadets take all their meals here.

ETHERIDGE HALL

Having been constructed in 1984, Etheridge Hall remained unnamed until 2007. The Board of Trustees named it in honor of MAJ Sammie C. Ethridge in recognition of his 50 years of dedicated service to the Academy. Seventeen rooms are available for Cadets as well as upstairs and downstairs TAC officer apartments with interior and exterior entrances. Rooms are set up as suites.

“Character is like a tree and reputation like its shadow. The shadow is what we think of it; the tree is the real thing.” — ABRAHAM LINCOLN

MCKENZIE HALL

Originally dedicated on January 18, 1976 as a girls’ dormitory, this building was named for Kathleen McKenzie, wife of Norman B. McKenzie, president of the Academy from 1966 until 1975. During his tenure, the Academy began accepting both boarding and day girls into the Corps of Cadets. After the girls’ boarding program was discontinued in 2002, the building hosted male Cadets for the 2002-03 school year before undergoing renovation in the fall of 2003. By spring of 2004, McKenzie Hall was converted into four faculty apartments.

THE MAINTENANCE BUILDING

The Maintenance Building was constructed just south of the Bolling Cafeteria in 1999. The building fulfilled a dire need for adequate storage and workspace in order to maintain and improve the historic campus.

Renovation crew working on the exterior of McComb Hall in 2009

THE WILDERNESS AREA

(Approximately 70 acres)

The grounds consist of an approximately one mile limestone road along the perimeter of the land, a paintball arena, obstacle courses, shooting range, confidence course, 4.5 acre lake and high-ropes course. In addition to these, the Wilderness Area has its own open-bay barracks as well as offices, a kitchen and pavilion area for eating and instruction, named Camp Killingsworth in honor of Major Allison Killingsworth’s almost fifty years of service in the Corps of Cadet. This Wilderness area is utilized regularly for weekly training events, Crusader Challenges and Basic Training of new Cadets.

ATHLETIC FIELDS

Chamberlain-Hunt Academy is equipped with a stadium for soccer or football and track and field on the northern-most end of campus. This facility is outfitted with a large concessions building, press box and the Salassi Field House. Also, the Academy features a baseball field and a large multi-purpose field on the south end of the main campus. A large pavilion with six basketball goals, four-square boxes and other capabilities sits adjacent to two regulation sand-volleyball courts in the middle of the main campus. Lastly, Chamberlain-Hunt has two fenced and lighted tennis courts adjacent to McComb Avenue and a swimming pool behind the gymnasium.

“Sports serve society by providing vivid examples of excellence.”

— GEORGE F. WILL

MILITARY

Military

Mission

The military program exists to provide fundamental order and structure to the academic, boarding and social life of Chamberlain-Hunt Academy.

Objectives

The objectives of the military program at Chamberlain-Hunt Academy are to teach Cadets the importance of becoming disciplined individuals capable of abiding by established rules and regulations, to develop a sense of self-respect and collective responsibility, to promote initiative and ownership of civic institutions, to develop sound leadership, and to facilitate character development.

The military model used by Chamberlain-Hunt Academy is flexible for “it serves the needs of adolescents who are compliant as well as the needs of those who are rebellious. Compliant Cadets can advance in rank and authority, growing as they assume positions of leadership and greater responsibility. They can take pride in their accomplishments, but they nevertheless are constantly reminded of the need for teamwork. The esprit de corps of a smoothly functioning military unit takes advantage of an adolescent’s need for peer approval, channeling it into positive and productive directions.” *

In addition to providing a basis for discipline, command and control of the Corps of Cadets, the military program provides a common denominator for objectively assessing leadership potential, teamwork, personal responsibility, collective responsibility and “*follower*ship.” A Cadet’s military grade is reflective of each of these areas.

* Herrin, Michael G. “The Need for Christian Military Schools,” published online at www.chamberlain-hunt.com/docs/Military_Model.pdf.

“The highest reward for man’s toil is not what he gets for it, but what he becomes by it.” — JOHN RUSKIN

Military Assessment

Scripture Memory and Weekly Planners—A portion of each Cadet’s military grade reflects weekly Scripture memorization, chapel and assembly notes, and weekly planner checks. Cadets are assessed for their personal preparedness and attention to detail, characteristics that are indispensable in military settings.

APFT

(Army Physical Fitness Test)

Each Cadet is given a diagnostic physical fitness test, two tests each semester. All Cadets are encouraged to seek high levels of physical fitness and to seek personal improvement regardless of their physical fitness level.

ECB

(Expert Cadet Badge)

The fall military exercise evaluates individual Cadets in twelve field skills. Cadets who achieve a perfect score on this evaluation are awarded the coveted Expert Cadet Badge.

CALFEX

(Combined Arms Live-Fire Exercise)

The Spring military exercise evaluates collective Cadet Skills, particularly leadership, “followership” and teamwork, and consists of three-days of bivouac and maneuvers against a live OPFOR (Opposing Force) in a field setting.

CRUSADER CHALLENGE

Cadets volunteer to compete in the Crusader Challenge, a physically and mentally intensive, five-day course, modeled after the U.S. Army’s Ranger School. Cadets must meet certain physical requirements to enter the course and must successfully pass a PAP (Physical Assessment Phase), TAP (Tactical Assessment Phase) and Peer/Staff Evaluations in order to be awarded the coveted Crusader Tab.

ATHLETICS

Chamberlain-Hunt Academy is a member of the Mississippi Private School Association (MPSA), which governs all sports programs, and it competes in District 3-AA.

Chamberlain-Hunt's mission, "Knowledge and Wisdom in Submission to God," applies to all athletic programs. An athlete's skills and abilities are gifts from God. Thus, the purpose of sports participation is to honor God by developing abilities and learning skills

that strengthen body and character. Cadets strive to be victorious in athletic contests, but will accept a defeat with humility and good sportsmanship so as to honor the opponent and God. Athletics are an indispensable part of Chamberlain-Hunt's training program; however, academics will always take priority over participation in interscholastic teams. Thus, the Athletic Department reports to the Academy's principal and is under his authority.

The Academy's athletic program includes both interscholastic sports and intramurals. It judges "success" by the process rather than the result. Coaches coach to win and the athletes play to win, but the win/loss record is much less important than the achievement of individual and team discipline and the development of the character qualities of honesty, integrity and sportsmanship.

“Prepare yourself for the world, as the athletes used to do for their exercise; oil your mind and your manners, to give them the necessary suppleness and flexibility; strength alone will not do.”

— EARL OF CHESTERFIELD

Chamberlain-Hunt offers six varsity sports: cross country, basketball, golf, soccer, tennis and track. Cross country starts the athletic season and begins a week after the Cadets start school. The cross country team competes each week in a meet on a 3.1 mile course. Basketball practice starts at the end of September. Its schedule of games is November through January, averaging three games per week. The basketball program offers a junior varsity team (7th, 8th and 9th graders) and a varsity team. Soccer practices begin in October; the team competes from November through January. Mid-January kicks off the busiest sports time with golf, tennis and track all beginning practice. Baseball offers a junior varsity and varsity team. Its eighteen game schedule is played February through March. Golf matches play on Mondays at public golf courses throughout the area, including Chamberlain-Hunt’s own Invitational, which is held at Mosswood Country Club. The golf schedule is from February through April. Female Cadets participate in two varsity sports: Tennis and Track. Tennis plays one or two matches per week. Cadets compete in singles play, doubles play and mixed doubles from February through April. During the spring, track competes weekly, and offers many running events, discus, shot put, high jump, long jump and pole vault. All of varsity and junior varsity sports have a district meet at which the team, or individuals, can qualify to compete for recognition at the South State level and, then, the State level.

INTRAMURAL PROGRAM

Chamberlain-Hunt offers intramurals every day after academic classes. Every Cadet who is not involved in an organized activity competes in a variety of sports such as volleyball, flag football, soccer, whiffleball, swimming, dodge ball, basketball, weight lifting, softball and others. Intramural victories and outstanding effort earn points for companies. At the conclusion of a cycle, the leading company receives rewards. The goals of intramurals are to emphasize physical conditioning, learning and improving sports’ skills, developing teamwork, displaying positive sportsmanship and giving our best effort all of the time. The intramural program makes use of Chamberlain-Hunt’s excellent facilities, including the swimming pool, volleyball courts, tennis courts, soccer field, baseball field, pavilion and track.

ATHLETIC ELIGIBILITY

All Cadets who participate in MPSA varsity athletic programs must meet the criteria for eligibility that is in the *Cadet Handbook*. A Cadet must maintain a 2.0 GPA and must have passed four core academic classes the previous semester of the academic year. New Cadets must have left their former school in good standing. A Cadet has only four years of eligibility from his entry date into the ninth grade. For junior varsity a Cadet must not have reached his 16th birthday before August 1 of the current year, and for the varsity a Cadet must not have reached his 19th birthday before August 1 of the current year.

ACADEMICS

academics

Chamberlain-Hunt’s military structure supports and encourages a studious environment on campus. Under the leadership of the principal, the Academy’s academics aim to challenge Cadets intellectually.

The Junior High is organized to better equip the younger Cadets to enter high school fully prepared. The Focus track helps boys who test below grade level gain skills in numeracy and literacy that are necessary for success in high school. The regular track helps boys who operate at the appropriate grade level to make progress, and the upper track challenges the brightest boys with Latin. The High School curriculum, likewise, offers some flexibility for boys depending upon their level of achievement upon entering the Academy. Small class sizes, which generally range from three to twelve, ensure that teachers can monitor and motivate progress in every Cadet.

In addition to the content of each course, Chamberlain-Hunt teaches study skills such as note-taking, summarizing and outlining, memorizing and test-taking to help Cadets succeed in the classroom.

Academics spiritually challenge Cadets, too. At all grade levels Cadets take a Bible course, ensuring that upon graduation they will have been exposed to Bible content, theology and apologetics. However, all teachers—not just Bible teachers—explain their subject areas from a Christian worldview and help Cadets analyze truth claims made in the various academic disciplines.

Every afternoon after regular academic classes are concluded, and before the school day ends, Cadets make their way to the tutorial or club of their choice. Tutorials are designed to allow teachers to spend precious one-to-one time with Cadets to help them grasp concepts they struggle may with, or to solidify learning. This, in addition to the morning study hall and study opportunities each evening allows Cadets ample time and assistance to remain current with their schoolwork. Clubs offered include art, bass and brass, Bible study, bridge, chess, choir, drum corps, guitar and piano, guitar players, handwriting and calligraphy, and spelling bee. In future years we also hope to offer culinary arts, swimming lessons, and practical skills such as basic electrical, building, and painting.

BIBLE AND PHILOSOPHY DEPARTMENT

Mission

The Bible and Philosophy department seeks to revive the medieval truth that theology is the “Queen of the Sciences.” It is only through

the clear vision of God’s word and works that we are fully able to understand the world over which we are commanded to have dominion.

Course Offerings

Old Testament Survey • Grade 7

2 Semesters – Junior High Credit

This course acquaints Cadets with the Historical and Poetical literature of the Old Testament. The Cadets become familiar with the primary characters and events of the Old Testament. As the Bible is read and explained, the Cadets learn foundational interpretation skills, so that they will know how to read and understand the Bible on their own. Because the rest of the Bible assumes knowledge of the history of Israel, this class prepares Cadets for all subsequent Bible classes.

New Testament Survey • Grade 8

2 Semesters – Junior High Credit

This course begins where Bible Survey I ended, with a survey of the prophetic literature of the Old Testament, which will serve as a backdrop for a study of the New Testament. This course reviews the history of the apostolic church, illustrating how the Apostles obeyed Christ’s command to take the gospel to the ends of the earth, making disciples of all nations. It emphasizes the life, death and resurrection of Jesus and how he fulfilled the Old Testament prophecies of the Messiah. In addition, it looks at Jesus’s continued work through his Apostles and the Church in the spread of the gospel.

Bible I (Covenants) • Grades 9-12

2 Semesters – 1 Credit

This course is designed to teach the Old Testament covenants from an exegetical and theological approach. Focusing on a covenantal understanding of scripture, this course encourages Cadets to see Christ’s work, not man’s, as the focus of all of the various manifestations of God’s covenant with his elect.

ENGLISH DEPARTMENT

Mission

The English department recognizes that effective and creative communication is prudent, necessary and, unfortunately, rare in our time. We believe that our task is to equip Cadets with fundamental understanding of language and to teach them to be well-spoken, well-written, well-read and creative. By accomplishing this task, academic achievement in all other disciplines will be better, as English is the basis for all other learning for our Cadets. At each grade level vocabulary is emphasized and specialized text books are utilized to help Cadets develop an appropriate grasp of English language usage.

Course Offerings

Grammar and Composition I • Grade 7 2 Semesters – Jr. High Credit
This course introduces systematic grammar and composition. It stresses basic language skills such as identifying and demonstrating proper use of capitalization and punctuation.

Grammar and Composition II • Grade 8 2 Semesters – Jr. High Credit
This course continues and expands the systematic grammar and writing taught in the seventh grade, stressing basic language skills such as identifying and demonstrating the proper use of parts of speech, identifying the parts of a sentence and demonstrating the proper use of capitalization and punctuation.

Fundamentals of World Literature • Grade 9 2 Semesters – 1 Credit
Taking a critical approach this course is organized under six heads: conflict; theme; character; structure; point of view; and moral tone. Texts studies range from classic to contemporary, covering genres such as fiction; nonfiction; poetry; and drama representing American; English; French; Russian; Swedish; and Japanese cultures. This course lays the foundation for the Cadet's understanding of interpretive literature and prepares him for the more detailed literary analysis in the tenth-grade. Scripture is used to illustrate and clarify literary concepts and Cadets are encouraged to use the information gleaned from reading to find meaning, to analyze that meaning in light of Scripture, and to apply the lessons to life.

Elements of Literature • Grade 10 2 Semesters – 1 Credit
Cadet's understanding of literature is broadened by focusing on advanced literary concepts. Students will learn the method and the importance of literary analysis by studying pieces from several genres (fiction; lyric poetry; drama; personal essay) and interpreting them in light of biblical truth. This course promotes critical thinking skills as key to understanding and appreciating literature. Shakespeare's drama *Romeo and Juliet* is typically studied.

“Never be entirely idle; but either be reading, or writing, or praying or meditating or endeavoring something for the public good.”

— ROBERT GRAVES

American Literature • Grade 11

2 Semesters – 1 Credit

More than seventy authors are introduced in a study that connects the authors' lives and beliefs as revealed in their writings with the corresponding literary periods. Lessons examine Colonial-Revolutionary, Romantic, Realistic/Naturalistic, and Modern literature and issues such as Darwinism and religious liberalism. Consideration is given to the cultural and historical events that affect each literary period and author, and class discussions assist Cadets progress from simple factual observations to evaluative understanding of the texts, and help them develop further literary and moral discernment.

British Literature • Grade 12

2 Semesters – 1 Credit

Continuing the historical approach begun in the previous course, texts typical of eight literary periods are examined in light of Scripture: Old English, Middle English, Tudor, Stuart, Neoclassical, Romantic, Victorian, and Modern. Such analysis serves to broaden the Cadet's world, enabling him to understand the ideas and writings of noted literary and historical figures and to apply biblical criteria when evaluating the beliefs espoused by such figures.

Rhetoric / Public Speaking • Grade 12

1 Semester – .5 Credit

This class is a one-semester course for seniors. With emphasis on good composition and research, this course transitions into teaching several speech styles to prepare Cadets not only for their Senior Speech, but also for more pragmatic post-graduation concerns such as effective job performance, interviews, etc. This course emphasizes efficient and effective preparation and presentation. The final exam for this class is the Senior Speech, a graduation requirement for all who hope to attain a Chamberlain-Hunt Academy diploma.

FINE ARTS DEPARTMENT

Mission

The purpose of the arts is to reflect God's unique and creative nature, bringing glory to him through the recognition and cultivation of our nature as God's image bearers.

Course Offerings

Music/Choir • Grades 9-12

Elective - .5 Credit

This course is designed to instill both a love of music and a practical understanding of how to read and perform different styles of music. Non-traditional harmonies and meters are explored, solo and group concerts are presented on a regular basis. Cadets learn the mechanics of choral music through daily study of basic theory, including part writing and ear training.

Art Appreciation • Grades 9-12

2 Semesters – 1 Credit

This course offers an overview of the development of art throughout history. Of foremost concern is that Cadets understand art as one means through which man reflects the image of God. Art is, when understood and performed properly, worship. Topics include cultural and historical influences, style characteristics, recurring themes within a period, major works and artists, and movements. Cadets tackle projects relating to their understanding and appreciation of artistic periods and the influence of technology on art throughout history.

Art Studio • Grades 9-12

2 Semesters – 1 Credit

This course is a directed study in two-dimensional art utilizing various media such as pastels, tempera, oils and acrylics in the production of a portfolio. The main focus of the class is color theory and its correct application. Cadets are required to complete a specified number of two-dimensional works in several different media demonstrating their grasp of color theory. Middle Ages since the medieval worldview is foreign to most post-modern readers. Most of the literature that this course focuses on is at least nominally Christian, though often profoundly erroneous in its expression of biblical truth. Therefore, special emphasis is placed on the ability to discern truth and falsehood in Christian-era literature and thought.

FOCUS PROGRAM

Mission

The Focus Program of Chamberlain-Hunt Academy is designed to equip seventh and eighth grade Cadets who fall below grade level equivalence with the skills required to succeed in the standard classroom.

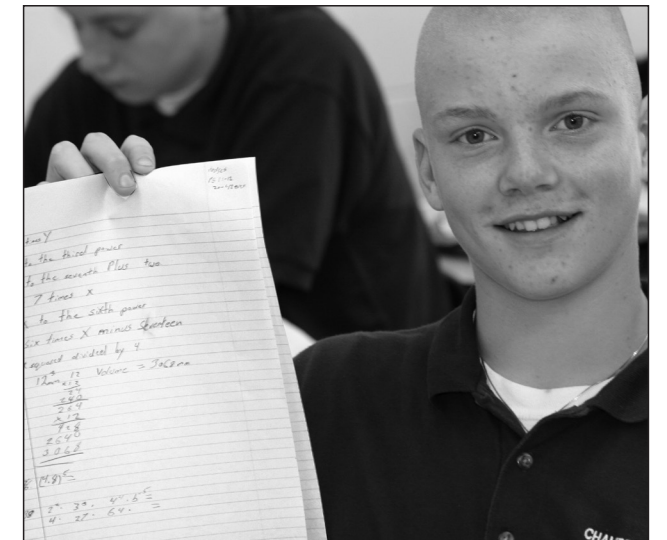

Course Offerings

Focus Reading

Focus Reading is designed as a solution for seventh and eighth grade Cadets who test below grade level in reading comprehension. Instructors give individualized attention in the areas of vocabulary, comprehension, grammar and mechanics. Cadets are routinely aided in regular class assignments as well as tested according to effort and improvement through assigned reading materials that are accompanied by computerized tests.

Focus Math

Focus Math is designed as a solution for seventh and eighth grade Cadets who test below grade level. Instructors teach the necessary skills for succeeding in high school mathematics. Cadets are routinely aided in regular class assignments as well as tested according to effort and improvement through assigned math problems that are accompanied by manual and computerized tests.

**“Truth which is merely told is quick to be forgotten;
truth which is discovered lasts a lifetime.”**

— WILLIAM BARCLAY

FOREIGN LANGUAGE DEPARTMENT

Mission

It is a popular, yet erroneous, notion that the only reason that one should study foreign language is so that he might speak it one day in a business or social setting. The study of non-native tongues enhances the mind and aids in understanding of one's own language, which facilitates every other imaginable course of study. We study foreign languages to gain greater understanding of the world that God designed and charges us to subdue. Therefore, learning foreign languages is both practical and necessary for anyone to be educated properly.

Course Offerings

French I • Grades 8-12

2 Semesters – 1 Credit

French I is an introductory course which aims at developing a basic understanding of the grammar of spoken and written French. Cadets work on developing conversation skills with the help of grammar exercises and pronunciation drills. Cadets are also exposed to French culture and history as well as the influence of French on English. Cadets are introduced to writing and translation. Course is taught in French and English.

French II • Grades 9-12

2 Semesters – 1 Credit

This course continues the work of French I with an emphasis on more advanced grammatical and syntactical structures as well as dictionary use. The Cadets work on improving their conversation, pronunciation and writing ability, and will work on translation and comprehension by means of children's literature. Course is taught in French and English.

Latin I • Grades 8-12

2 Semesters – 1 Credit

Latin I is designed to introduce Cadets to the basics of Latin grammar and vocabulary. It includes a general overview of Roman life in the days of the Empire and a significant amount of Roman mythology. Cadets establish a firm basis for Latin II as well as a deeper understanding of English vocabulary and grammar.

Latin II • Grades 9-12

2 Semesters – 1 Credit

Latin II is a continuation of Latin I. The course includes more advanced grammar such as subjunctive mood. Cadets are introduced to the writings of Caesar as well as those of other noteworthy Romans, such as Cato and Catullus. This course completes the

Cadet's knowledge of Latin grammar and prepares him for Latin III. Cadets translate from Latin to English and English to Latin and continue building their vocabulary.

Spanish I • Grades 8-12

2 Semesters – 1 Credit

This course in elementary Spanish is designed to give Cadets a basis for grammatical structure and provide practice in fundamental spoken Spanish. Cadets are prepared for the more complex grammatical structure they will encounter in Spanish II.

Spanish II • Grades 9-12

2 Semesters – 1 Credit

Spanish II is a continuation of Spanish I, building on the use of the language. Cadets must demonstrate proficiency in speaking, reading and writing in Spanish.

HISTORY DEPARTMENT

Mission

Chamberlain-Hunt recognizes that the Triune God of the Bible is the Creator of all things and has ordained that we, his image-bearers, have dominion over the rest of His creation. Therefore, to be educated about any part of creation is to know better our God and the world He made. Then we may further fulfill our purpose of existence: to glorify God and enjoy Him forever. This worldview allows Cadets to learn how mankind has responded to this Genesis One command since the beginning of time.

Course Offerings

Mississippi History • Grade 9

1 Semester - .5 Credit

This one semester course surveys the abundant cultures and profound events in Mississippi's history. Topics covered include Indian cultures, slave culture, antebellum life, the Reconstruction, the Church, Mississippi writers and Mississippi musicians.

World Geography • Grade 9

1 Semester - .5 Credit

This one semester course highlights the physical and political landscape of the world. Emphasis is placed on map identification of major regions, cities, landforms and cultures around the world. The purpose of this required course is to provide Cadets with a geographical framework to understand better high school historical and cultural lessons.

World History • Grade 10

2 Semesters - 1 Credit

This course is a chronological study of world history beginning with the early civilizations of Sumer and Egypt, and ends with ideas and events of the late 19th century. The course emphasizes the political bodies, social settings, customs and practices (including warfare), and worldview developments of every civilization. Special emphasis is also placed on the history of the Church, which is imperative for any true understanding of the events and ideas concerning world history. This course assumes and promotes the historical accuracy of the Bible and the enduring doctrines that it teaches.

“The past is a source of knowledge, and the future is a source of hope. Love of the past implies faith in the future.”

— STEPHEN AMBROSE

United States History • Grade 11

2 Semesters – 1 Credit

The purpose of this course is to provide an outline of the events and ideas of United States history in order to understand how each event/idea logically leads to the next. This course begins with the first discoveries of America and ends with the 20th century. The recurring theme of this course is the biblical doctrine of man’s depravity.

20th Century History • Grade 12

1 Semester - .5 Credit

This elective course highlights profound philosophical changes of the late nineteenth and 20th centuries. As a result of world wars and technological advances, the 20th century marks the merging of America in world affairs. Emphasis is placed on the sources and defining characteristics of Modernism and Post-Modernism. This course is taught in conjunction with ENG 422 – 20th Century Literature.

Government • Grades 11-12

1 Semester - .5 Credit

This one semester course explores man’s need to operate under temporal authority. The need for government is explained in light of Romans 13, and various models of civil government are explored as temporal attempts to impose order over man’s natural rebellion. In relation to American civil government, emphasis is placed on presidential leadership, the legislative process and current events as they pertain to politics.

Economics • Grades 11-12

1 Semester - .5 Credit

Economics is a one semester course that is aimed at teaching Cadets good stewardship of God’s material blessings. Emphasis is placed on economic systems, supply-and-demand, need-versus-want and budgeting.

LIBRARY

Mission

The library exists to support the educational program of Chamberlain-Hunt Academy.

Objectives

The library provides print resources so that Cadets may explore areas of human knowledge of interest in order to better understand God’s world and his purpose for their lives. Goals for the library are (1) to maintain and build on a collection to support the Academy’s curriculum, (2) to provide easy access to information in a variety of formats, (3) to continue planning and implementation of a library instruction program to develop Cadet’s proficiency in use of information resources and (4) to maintain an environment conducive to research.

**“The way to learn to do things is to do things.
The way to learn a trade is to work at it.
Success teaches how to succeed.
Begin with the determination to succeed,
and the work is half done already.”**

— AUTHOR UNKNOWN

MATHEMATICS DEPARTMENT

Mission

We believe each Cadet has a God-given academic potential. The main requirements for success in mathematics are a positive attitude, willingness to work, classroom attention and class preparation. Regardless of the vocational direction that each Cadet takes, Chamberlain-Hunt seeks for each to gain a greater understanding of the intricate and wondrous nature of God's created order.

Course Descriptions

Basic Math • Grades 7-8

4 Semesters – Jr. High Credit

This entry-level course reviews arithmetic processes including decimal, fraction and percentage problems with a view to practical applications to everyday life. Geometry, integers and statistics are introduced.

Pre-Algebra • Grades 7-9

2 Semesters – Jr. High Credit

This course covers much of the same material as Basic Math but is designed to prepare the Cadet to think algebraically. Fractions, decimals, proportions and percentage problems are thoroughly reviewed. Number theory, integers and rational numbers are introduced, and equation construction and solving is stressed. Coordinate graphing and inequalities are also introduced.

Algebra I • Grades 8-11

2 Semesters – 1 Credit

Cadets are introduced to Algebra by studying variables and expressions, properties, verbal problems, integers, operations with rational numbers, equations, inequalities, polynomials, scientific notation, factoring, rational expressions, graphing with points and linear equations and functions.

Geometry • Grades 9 – 12

2 Semesters - 1 Credit

This year-long course introduces Cadets to the language of Geometry, and includes the study of geometric proofs, parallels, congruent triangles, quadrilaterals, similarity, right triangles and trigonometry, circles, polygons and area.

Algebra II • Grades 10 – 12

2 Semesters - 1 Credit

This year-long course includes the study of equations and inequalities, linear relations and functions, systems of equations and inequalities, matrices, polynomials, irrational and complex numbers, and quadratic equations. This course will prepare Cadets for the study of trigonometry.

Consumer Math • Grades 10-12

2 Semesters – 1 Credit

Designed to prepare Cadets for making financial decisions, this course helps Cadets get to grips with taxes, interest on loans and savings, personal banking, and costs of transportation, food, clothing, utilities, insurance and much more. Being a good steward of the Lord's money is a significant emphasis.

Advanced Math • Grade 11-12

2 Semesters – 1 Credit

This year-long course prepares Cadets for the study of calculus. They will learn about linear relations and functions, systems of equations and inequalities, graphs, polynomial and rational functions, trigonometric functions, graphs and inverses of trigonometric functions, trigonometric identities and equations, vectors and parametric equations, polar coordinates and complex numbers, circles, exponential and logarithmic functions, sequences and series, combinations and probability, statistics and data analysis, graph theory, limits, derivatives and integrals.

Calculus • Grade 12

2 Semesters – 1 Credit

Cadets study the Cartesian plane and functions, limits and their properties, differentiation and its application, and integration.

ACT Prep • Grades 10 – 12

Elective – .5 Credit

This course is designed to prepare Cadets to take the ACT or, in special cases, the SAT. Cadets review topics from Elementary Algebra, Pre-Algebra, Algebra I and II, and Geometry; in addition, they practice reading and grammar skills.

College Algebra • Grade 12

2 Semesters – 1 Credit*

This course is designed to both fulfill an upper-level math requirement and give select Cadets a valuable opportunity to gain college credit alongside this high school credit. The course is taught at Chamberlain-Hunt by an adjunct professor from a local college or university. Material covered includes the study of equations and inequalities, linear relations and functions, systems of equations and inequalities, matrices, polynomials, irrational and complex numbers, and quadratic equations.

* If requirements are met, Cadets will additionally receive 3 credit hours at the college-level.

SCIENCE DEPARTMENT

Mission

Chamberlain-Hunt Academy teaches science from the perspective that God created everything, including man. Knowing this, Cadets gain the framework to rightly understand their relationship to God, to other people and to everything else God created.

Course Offerings

Earth and Space Science • Grade 7

2 Semesters – Jr. High Credit

A study of our planet including matter, minerals, rocks, landforms, weathering erosion forces, earthquakes, volcanoes, plate tectonics, fossils, atmosphere, oceanography, our impact on the land, air and water, and ending with astronomy. The course focuses on the true origins of earth according to Genesis and on God's craftsmanship in ordering it.

Life Science • Grade 8

2 Semesters – Jr. High Credit

This course is a study of life beginning with the structure and processes of cells, heredity, plants, animals, ecology and the human body. This course explains the theory of Evolution; however, it stresses the biblical account of the origin of man and God's craftsmanship in designing life.

Biology I • Grades 8-11

2 Semesters – 1 Credit

This survey course builds on foundational chemical and cellular structure in the animal kingdom. It covers genetics, normal and abnormal, as well as tissue types, and microbial and multi-cellular life. A comparison of Evolution with a Creationist view is an integral part of the classroom method. Laboratory work, where appropriate, is provided, and basic biochemistry is fundamental.

Physical Science • Grades 9-12

2 Semesters – 1 Credit

This course introduces Cadets to observational science through a survey of the physical sciences, physics and chemistry. Not only is the philosophy of science introduced, Cadets are greatly helped by hands-on experimentation and inquiry-based activities.

Chemistry I • Grades 9-12

2 Semesters – 1 Credit

This course is organized around a basic premise: that structure determines function. To this end atomic theory at the micro-level is fundamental. There is an extensive presentation of chemical equations and classroom practice in balancing them. Cadets use the

— continued on page 46

**“Knowledge of science is so much smoke apart from
the heavenly science of Christ.”**

— JOHN CALVIN

chemical laboratory extensively, enabling them to master laboratory equipment. This course, when completed, will provide the Cadet with a clear basic understanding of the chemical nature of life.

Chemistry II • Grades 10-12

2 Semesters – 1 Credit

This course expands the concepts taught in Chemistry I. Cadets explore atomic level explanations and apply organic chemistry concepts. The course further expands their study into inorganic chemistry.

Physics • Grades 11-12

2 Semesters – 1 Credit

This basic mathematical science course presents a study of mechanics and Newton’s laws of motion. Included here are explanation and practice concerning forces and vectors. Wave theory is presented, along with basic sound and light theory. The study of matter covers both the state of matter and fluid mechanics. Electro-magnetic theory is introduced as applied specifically to magnetism and electricity.

General Science • Grades 11-12

2 Semesters – 1 Credit

This class provides a review of the four areas of general science: Biology, Physics, Chemistry and Earth Science. It is specifically designed for those Cadets who do not need Physics for college entrance.

SOME ADVANTAGES OF A CHRISTIAN ACADEMY

Chamberlain-Hunt Academy is first and foremost a Christian institution committed to its mission: “Knowledge and Wisdom in Submission to God.” While the Academy does not require Cadets to sign a statement of faith, the entire faculty and staff at Chamberlain-Hunt are Christians and believe that mankind exists for the purpose of glorifying and delighting in God. Whether it is in the classroom, in the dorm or on the playing field, faculty and staff encourage Cadets to do whatever they do as unto the Lord.

The fact that Chamberlain-Hunt is a Christian academy means that Cadets are under the care of teachers and staff who model the attributes of a Christ-like life, and view their position not as a job but as a ministry. The faculty and staff at Chamberlain-Hunt seek to cultivate an environment free from distractions and temptations that is conducive to holy living.

Chamberlain-Hunt Academy operates under the conviction that the Bible is the “inspired, inerrant word of God and is profitable for teaching, for reproof, for correction and for training in righteousness, that the man of God may be competent, equipped for every good work” (1 Timothy 3:16). Furthermore, since the fear of the Lord is the beginning of wisdom, a Christian worldview perspective governs the teaching in all classes and all Cadets attend Sunday worship, daily devotions, and Bible class. Education is not an end in itself but instrument that enables us to know God better and to develop the moral character and intellect necessary for living a life that pleases him.

SOME ADVANTAGES OF A MILITARY ACADEMY

Chamberlain-Hunt Academy renders invaluable assistance to the home for the education and proper development of young men. Cadets receive some excellent things at the Academy that they would probably not receive at home. Many parents readily admit that they require too little of their sons, often looking after every little detail for them long after they should be assuming responsibilities and learning self-reliance. Sometimes parents, for a great variety of reasons, place very few restrictions upon boys, allowing them to develop attitudes and habits that are unattractive and detrimental to their best development.

Chamberlain-Hunt Academy Cadets are accountable for their actions. The Academy expects them to follow the standards and abide by the rules, which are worthwhile in challenging growing boys toward manhood. In an effort to make a place for himself in the life of the Academy and to grow in knowledge and wisdom in submission to God,

“Character is a by-product: it is produced in the great manufacturer of daily duty.”

— WOODROW WILSON

the Cadet finds incentive to do his best and to lay aside childish habits. Military standards encourage neatness, accuracy, punctuality and respect for authority. The godly men who supervise and encourage Cadets are sympathetic and patient, as well as firm. They expect Cadets to do their best. In such an environment development is often rapid and is indeed gratifying to parents and teachers and satisfying to the boys themselves.

LIFE AWAY FROM HOME

In planning for your child to go away to school, it is wise for both parents and son to realize that some adjustments will be necessary. Your son, likely, will have periods of “homesickness.” Some of his letters may request that you allow him to come home, especially during the difficult adjustments to military boarding life. Parents are often tempted to make the serious mistakes of encouraging the Cadet in his lack of adjustment or of withdrawing him entirely. Parents need to be both sympathetic and wise, not too easily upset, willing both to make adjustments in their own lives and to help their son do the same. Almost without exception, if the Cadet is encouraged to adjust and to be committed to the process, he becomes happy and eager in his work, and able to deal with the demands of life at Chamberlain-Hunt. Among the other marks of development, he also tends to show a deeper and more mature appreciation of parents and home, which is well worth the discomfort of pressing through the adjustment period.

Chamberlain-Hunt Academy admits Cadets of any race, color or national or ethnic origin to all the rights, privileges, programs and activities generally accorded or made available to students at the school. It does not discriminate on the basis of race, color or national or ethnic origin in administration of its educational policies, scholarship and loan programs, athletics or other school administered programs. While its day program

is open to both boys and girls in grades seven through twelve, the boarding program is open only to boys in grades seven through twelve.

Parents (or legal guardians) must consent to and support all policies and procedures as outlined in the Cadet Handbook for their child(ren) to be considered for enrollment.

To apply for admission to Chamberlain-Hunt’s Corps of Cadets, please submit a completed application to the office of admissions along with a \$50.00 application fee. The application fee for non-resident, non-US citizens is \$200; English language proficiency is required for admission.

Applications, along with current enrollment fee schedules, are available either from the office of admissions or from the Academy’s Web site. To obtain an application, please contact the admissions office as follows:
